

## **HEMISPHERE ENERGY COMMENCES DEVELOPMENT PROGRAM AND GRANTS INCENTIVE STOCK OPTIONS**

**TSX-V: HME**

Vancouver, British Columbia, September 21, 2017 – Hemisphere Energy Corporation (TSX-V: HME) ("Hemisphere" or the "Company") is pleased to announce that it has initiated its fall development program and has granted incentive stock options.

### **Development Program**

Hemisphere has commenced its previously announced drilling program consisting of seven wells in the Atlee Buffalo area of southeast Alberta (news release dated September 15, 2017). Of these seven horizontal development wells, drilling plans include three producing wells into the Upper Mannville F pool, three producing wells into the Upper Mannville G pool, and one injector well into the Upper Mannville G pool. Results will be announced as they become available.

As part of the development program the Company plans to expand its facility at the F pool and construct a new water separation and re-injection facility in the G pool. The expansion of the F pool facility will offer Hemisphere the ability to optimize current producing wells and provide additional capacity for continued drilling. The new G pool facility will allow the Company to handle production from new wells and to tie-in and turn up its first G pool well producer, which was drilled in the summer of 2016 and has been producing at a limited capacity to tanks.

Overall production from Atlee Buffalo has continued to improve through 2017 and additional information collected from this drilling program will help to expand and improve the Company's reservoir model, which will be used to define an aggressive 2018 drilling program.

"This level of capital expenditure and number of drilling locations represents the largest development program Hemisphere has completed since 2014," said Don Simmons, President and Chief Executive Officer. "It characterizes a major shift from a period of capital conservation to substantial growth for the Company."

### **Stock Option Grant**

The Company has granted incentive stock options to officers, directors, employees, and consultants of the Company, and a company performing investor relations services entitling them to purchase up to a total of 5,034,000 common shares at an exercise price of \$0.25 each, pursuant to the Company's Stock Option Plan. The stock options are exercisable for a term of five years with one-third vesting on the grant date, one-third vesting on the first anniversary of the grant date, and one-third vesting on the second anniversary of the grant date.

### **About Hemisphere Energy Corporation**

Hemisphere Energy Corporation is a producing oil and gas company focused on developing conventional oil assets with low risk drilling opportunities. Hemisphere plans continual growth in production, reserves, and cash flow by focusing on existing assets with significant growth potential and executing strategic acquisitions. Hemisphere trades on the TSX Venture Exchange as a Tier 1 issuer under the symbol "HME".

### **Forward-looking Statements**

*This news release contains "forward-looking statements" that are based on Hemisphere's current expectations, estimates, forecasts and projections. The words "estimates", "projects", "expects", "intends", "believes", "plans", or their negatives or other comparable words and phrases are intended to identify forward-looking statements and include statements regarding Hemisphere's plans for its fall development drilling program and the timing thereof; the operational developments anticipated to result from the planned drilling program and other expectations, intentions, and plans that are not historical fact.*

*Forward-looking statements are based on a number of material factors, expectations, or assumptions of Hemisphere which have been used to develop such statements and information but which may prove to be incorrect. Although Hemisphere believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because Hemisphere can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified herein, assumptions have been made regarding, among other things: that Hemisphere will continue to conduct its operations in a manner consistent with past operations; results from drilling and development activities are consistent with past operations; the quality of the reservoirs in which Hemisphere operates and continued performance from existing wells; the continued and timely development of infrastructure in areas of new production; the accuracy of the estimates of Hemisphere's reserve volumes; certain commodity price and other cost assumptions; continued availability of debt and equity financing and cash flow to fund Hemisphere's current and future plans and expenditures; the impact of increasing competition; the general stability of the economic and political environment in which Hemisphere operates; the general continuance of current industry conditions; the timely receipt of any required regulatory approvals; the ability of Hemisphere to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects in which Hemisphere has an interest in to operate the field in a safe, efficient and effective manner; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development and exploration; the timing and cost of pipeline, storage and facility construction and expansion and the ability of Hemisphere to secure adequate product transportation; future commodity prices; currency, exchange and interest rates; regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which Hemisphere operates; and the ability of Hemisphere to successfully market its oil and natural gas products.*

*The forward-looking information and statements included in this news release are not guarantees of future performance and should not be unduly relied upon. Such information and statements, including the assumptions made in respect thereof, involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; changes in the demand for or supply of Hemisphere's products, the early stage of development of some of the evaluated areas and zones; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in development plans of Hemisphere or by third party operators of Hemisphere's properties, increased debt levels or debt service requirements; inaccurate estimation of Hemisphere's oil and gas reserve volumes; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time-to-time in Hemisphere's public disclosure documents, (including, without limitation, those risks identified in this news release and in Hemisphere's Annual Information Form).*

*The forward-looking information and statements contained in this news release speak only as of the date of this news release, and Hemisphere does not assume any obligation to publicly update or revise any of the included forward-looking statements or information, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.*

**Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.**
