Hemisphere: A Top Tier Canadian Junior

Q1 2026 Corporate Production

3,811 boe/d
(99% heavy oil)

54 Producing Wells
~70 boe/d per well

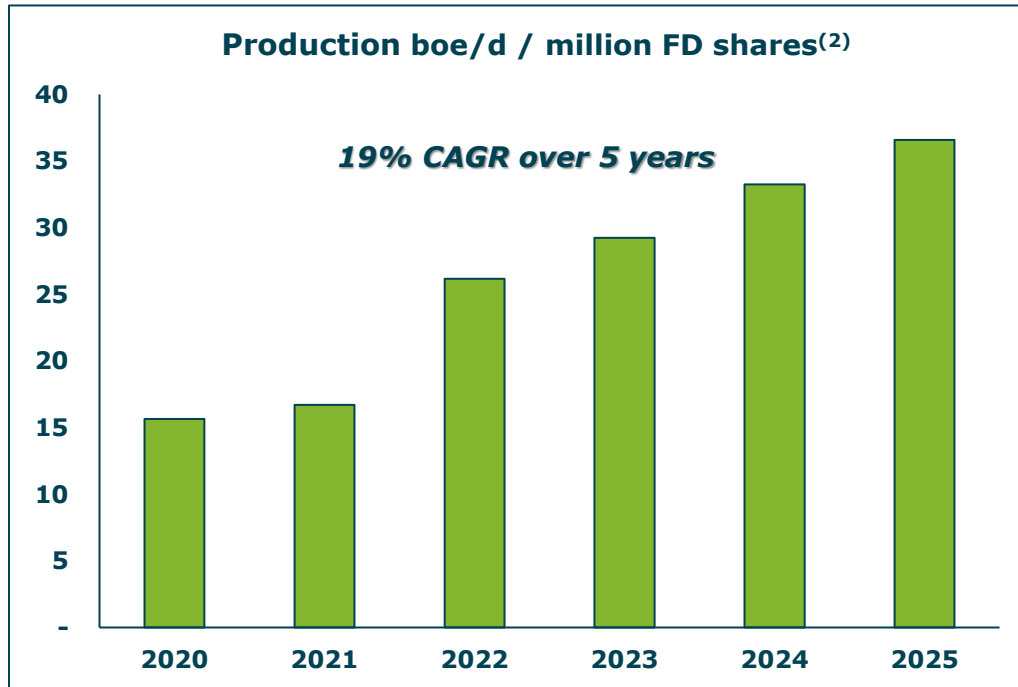

Company Snapshot

TSX-V (Canada)	HME
OTCQX (USA)	HMENF
Share Price (TSX-V) May 14, 2026	\$2.85
Basic Shares Outstanding	94.4 million
Fully Diluted Shares Outstanding	98.6 million
Insider Ownership	~16% / ~19% Basic Diluted
Market Capitalization⁽¹⁾ May 14, 2026	\$269.0 million
Working Capital⁽²⁾ March 31, 2026	\$13.9 million
Enterprise Value May 14, 2026	\$255.1 million

(1) Market capitalization reports the non-diluted issued and outstanding common shares as of May 14, 2026 multiplied by the closing price of the common shares on that date.

(2) Non-IFRS measure that does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. See Advisory statements "Non-IFRS and Other Financial Measures" and "Financial Information".

Hemisphere's Timeline: Track Record and Compound Annual Growth Rate⁽¹⁾

(1) CAGR is the compound annual growth rate representing the measure of annual growth over multiple time periods.

(2) Fully-diluted shares as at December 31 of each year-end.

(3) Non-IFRS measure that does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. See Advisory statements "Non-IFRS and Other Financial Measures" and "Financial Information".

Hemisphere's Financial Highlights: Q1 2026

TSX-V: HME
OTCQX: HMENF

Three Months Ended March 31, 2026		
Average Production (99% heavy oil)	3,811 boe/d	
Revenue	\$25.4 million	\$74.07/boe
EBITDAX ⁽¹⁾	\$15.3 million	\$44.60/boe
Adjusted Funds Flow ("AFF")⁽²⁾	\$12.7 million	\$36.97/boe
Capital Expenditures ⁽²⁾	\$3.1 million	
Free Funds Flow ("FFF")⁽²⁾	\$9.6 million	
Working Capital ⁽²⁾ (at March 31, 2026)	\$13.9 million	

(1) EBITDAX (Earnings Before Interest, Taxes, Depreciation, Amortization and Exploration Expense) is a non-GAAP financial measure and does not have a standardized meaning under IFRS. This measure is used by management to evaluate operating performance, excluding the impact of interest, taxes, depreciation and amortization expenses, which can vary significantly among companies. Management believes EBITDA provides useful supplemental information to investors about the Company's operating performance and financial condition. See Advisory Statements "Non-IFRS and Other Financial Measures" and "Supplementary Financial Measures" for a reconciliation of EBITDA to the most directly comparable IFRS measure for the period.

(2) Operating netback, AFF, AFF per barrel, capital expenditures, FFF, and working capital are non-IFRS financial measures and/or ratios that are not standardized financial measures and/or ratios under International Financial Standards ("IFRS") and may not be comparable to similar financial measures disclosed by other issuers. Refer to "Non-IFRS and Other Financial Measures" section in Advisory Statements.

Balancing Growth with Return to Shareholders

TSX-V: HME
OTCQX: HMENF

Price Sensitivity		US\$60/bbl WTI	US\$80/bbl WTI	US\$100/bbl WTI
Average Annual Production	boe/d	3,900	3,900	3,900
Adjusted Funds Flow ("AFF") ⁽²⁾	\$ million	40	57	78
AFF per basic share ^(2,3)	\$/share	0.42	0.60	0.83
Capital Expenditures ⁽²⁾ & ARO ⁽⁴⁾	\$ million	12	12	12
Free Funds Flow ("FFF") ⁽²⁾	\$ million	28	45	66
FFF per basic share ^(2,3)	\$/share	0.29	0.47	0.70
Base Dividends per basic share ⁽³⁾	\$/share	0.10	0.10	0.10

2026 Capital Expenditures - \$12 million

- › Development projects
- › Exploration and land acquisition
- › Flexibility to easily grow or reduce program with market conditions

Key Assumptions⁽¹⁾

- › WCS Differential: US\$15.00/bbl
- › Cdn\$ to US\$ Exchange Rate: 0.73
- › Quality Adjustment: \$4.00/bbl
- › Opex: \$15.00/boe

⁽¹⁾ See Advisory Statements "Forward Looking Information and Statements" and "Forward Looking Financial Information" and "2026 Corporate Guidance Assumptions".

⁽²⁾ AFF, AFF per basic share, capital expenditures, FFF, and FFF per basic share set forth on this slide are each forward looking non-IFRS financial measures that are not standardized financial measures under International Financial Reporting Standards and may not be comparable to similar financial measures disclosed by other issuers. See Advisory Statements "Non-IFRS and Other Financial Measures".

⁽³⁾ Using a 2026 weighted-average of 94.6 million basic shares issued and outstanding.

⁽⁴⁾ Includes \$0.4 million in Asset Retirement Obligations ("ARO").

⁽⁵⁾ Amounts do not include potential future purchases through the Company's Normal Course Issuer Bid (NCIB).

Hemisphere's Value is in Our Long-Life Reserves: Third-Party Evaluated Estimate of Future Cash Flow

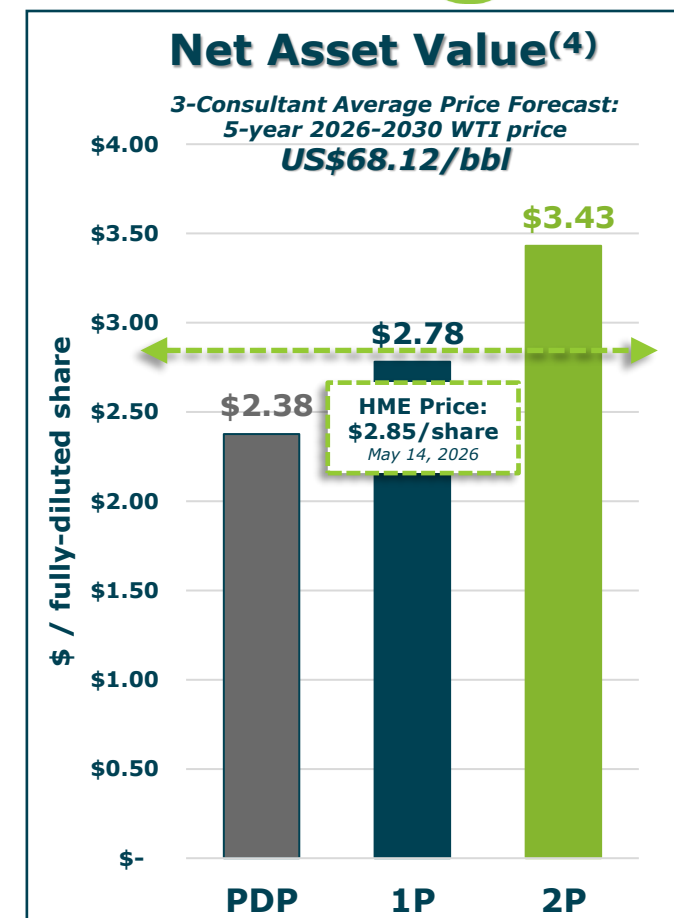

Significance of Reserve Reports

- › Best way to compare a company's assets and future cash flows with its peers
- › Includes future development capital, operating & transportation costs, royalties, existing and future decommissioning liabilities

2025 Year-End Reserves	Reserves ⁽¹⁾	NPV10 Before Tax ⁽¹⁾
Proved Developed Producing (PDP)	9.3 MMboe	\$212 million
Proved (1P)	11.8 MMboe	\$252 million
Proved + Probable (2P)	15.2 MMboe	\$316 million

	Reserve Life Index ⁽²⁾	Future Development Costs ⁽³⁾
Proved (1P)	8.9 years	\$32 million
Proved + Probable (2P)	11.4 years	\$43 million

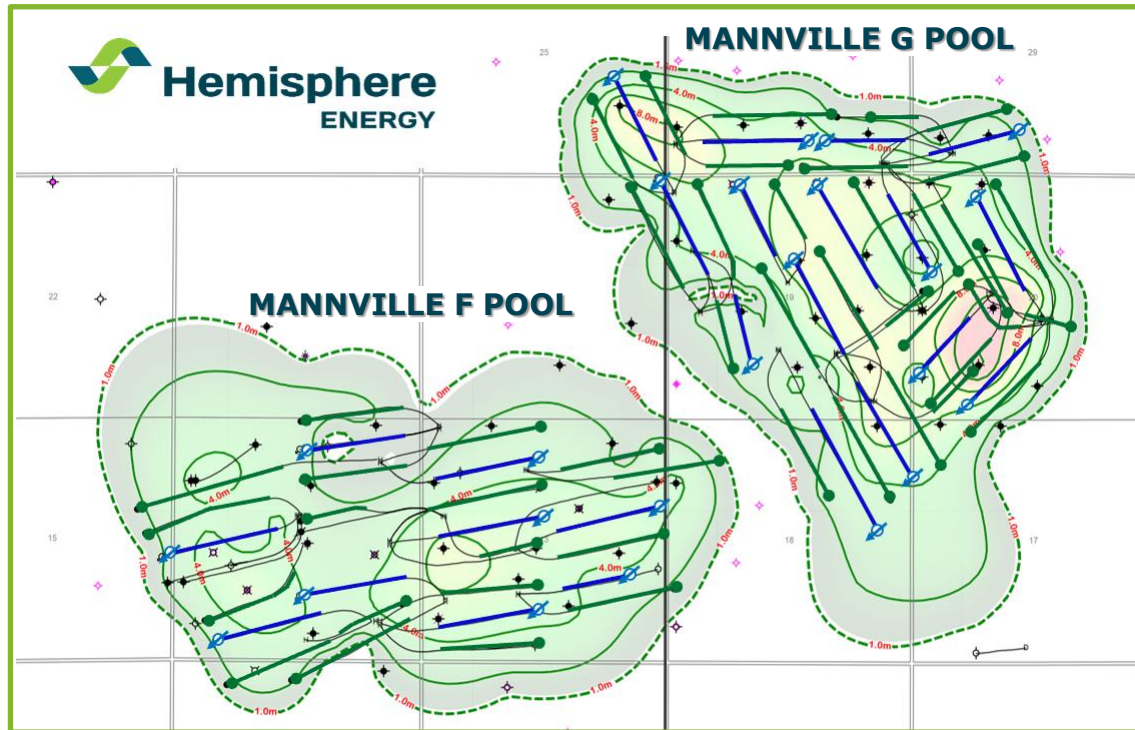

(1) Reserve volumes and net present values are as attributed by McDaniel & Associates Consultants Ltd, discounted at 10% and before tax (NPV10 BT), in the independent reserve report prepared for Hemisphere in accordance with NI 51-101 effective as of December 31, 2025 and run at the January 1, 2026 3-Consultant Average Price (the "McDaniel Reserve Report"), and including all corporate abandonment, decommissioning, and reclamation estimates. The 3-Consultant Average Price Forecast is an average of the published price forecasts for McDaniel, GLJ Petroleum Consultants Ltd., and Sproule Associates Ltd. at January 1, 2026. It uses a 5-year 2026-2030 WTI price of US\$68.12/bbl and WCS Cdn\$74.29/bbl (+2%/yr thereafter).

(2) Reserve life index (RLI) is calculated as total company interest reserves divided by annual 2025 production.

(3) Total discounted at 10%, as disclosed in news release dated March 11, 2026.

(4) Calculated using the respective net present values of PDP, 1P, and 2P reserves, before tax and discounted at 10%, plus internal valuations of \$2.9 million for both undeveloped land at \$75/acre for 30,919 acres and \$0.55 million for seismic, plus \$5.5 million for proceeds from stock options, plus Q1'26 working capital of \$13.9 million, and divided by 98.6 million fully-diluted outstanding shares at March 31, 2026. Net present values are shown at the 3-Consultant Average Price Forecast used in the McDaniel Reserve Report. Working Capital is a non-IFRS measure that does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other issuers. See Advisory statements "Non-IFRS and Other Financial Measures" and "Financial Information".

Hemisphere's Cash Flow Engine: Atlee Buffalo, Alberta

Enhanced Oil Recovery

Oil pools being developed with a **polymer flood**

- › **Maximize** resource recovery
- › **Minimize** decline rates

'Cash-flow harvest' mode

- › Proved reserves in Atlee F & G pools of over **10 million barrels**

Conventional Oil Pools

- › Over 90% of corporate production
- › 100% owned and operated
- › High-quality reservoirs (porosity and permeability)

Hemisphere's Proven Method of Enhanced Oil Recovery (EOR): Polymer Flooding

Polymer flooding has been successfully used by oil companies all around the world since the 1950's

- › Polymer is added to injection water to **increase its viscosity** (similar to olive oil) and reduce its ability to easily 'streak' through the reservoir and break through to producers
- › Polymer-water is pumped into injector wells to **re-energize (build pressure)** the reservoir and push more oil towards producer wells

When does polymer work? With the right rock, oil quality, and play type

TSX-V: HME
OTCQX: HMENF

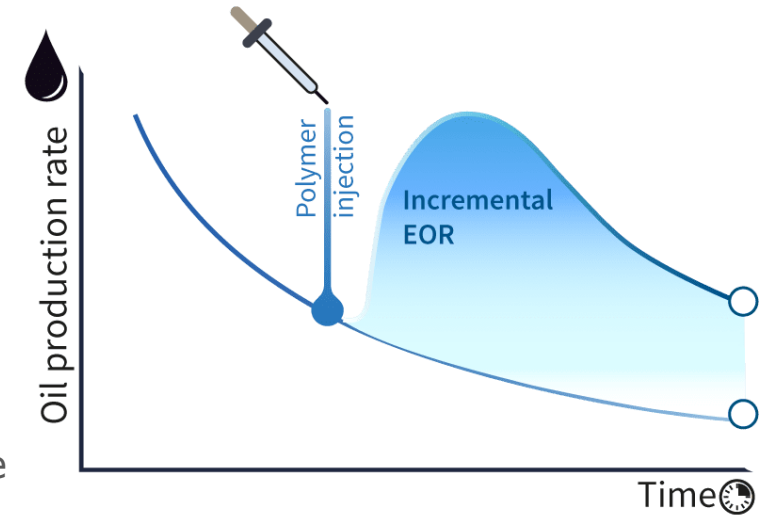

Typical Reservoir Response

INCREASE in oil production

INCREASE in overall oil recovery

DECREASE in production decline rate

DECREASE in water production handling costs

Polymer Flooding = More Oil → Faster

What REALLY makes Hemisphere unique?

Polymer Flood = Lower Decline = More Free Cash Flow⁽¹⁾

'Typical' Oil & Gas Co:

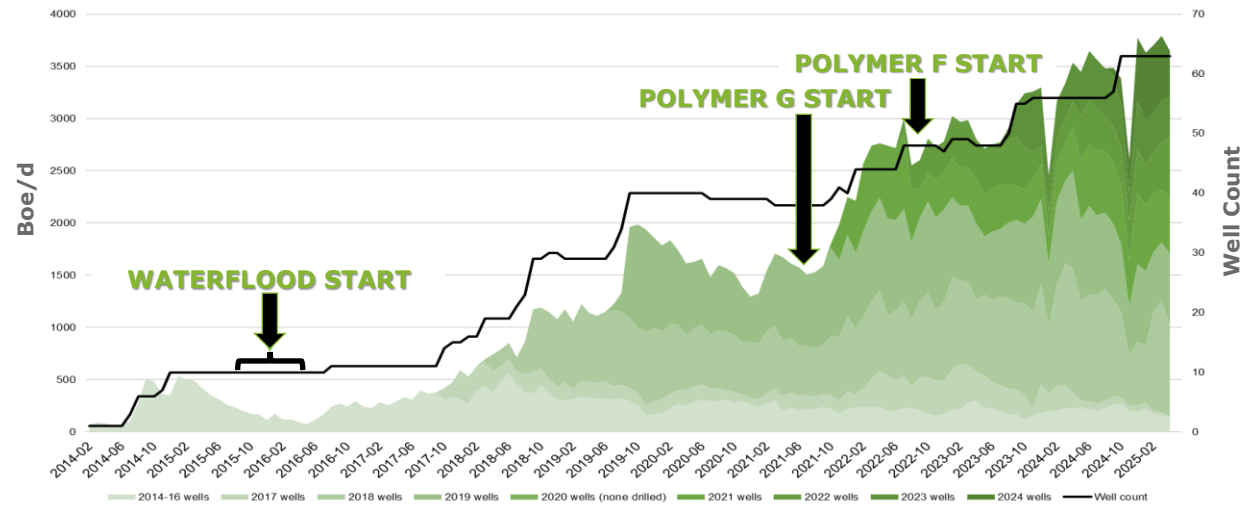

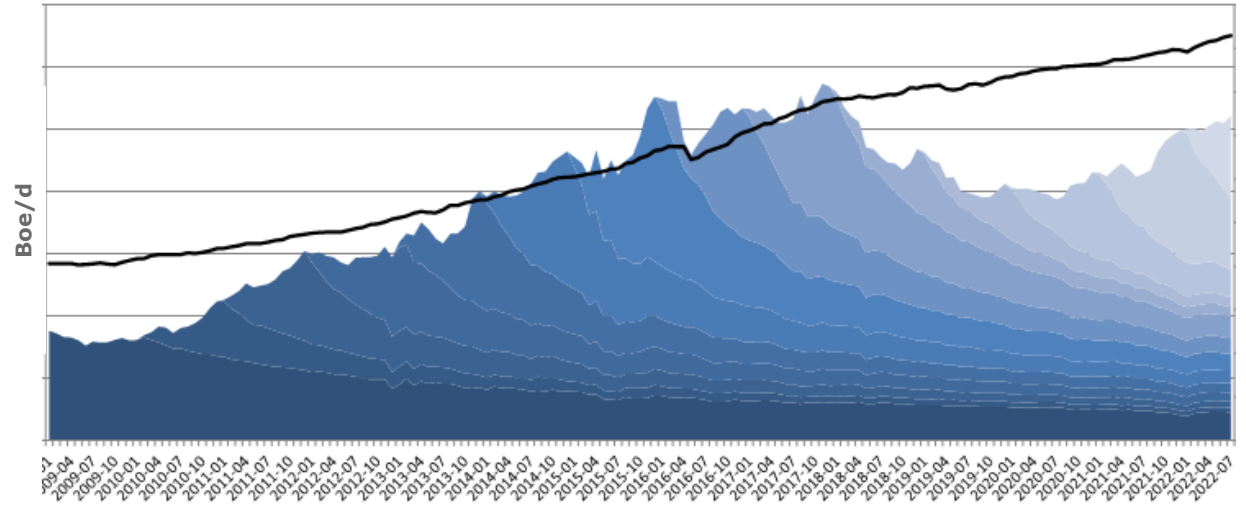

Treadmill style drilling
with corporate production
decline rates of 20% - 30%

Average of estimated 2024
Canadian corporate decline rates⁽²⁾:

Junior – 30%
Intermediate – 29%
Large Cap – 16%

Hemisphere Energy:

Lower production decline rate
reduces sustaining capital and
increases free cash flow

(1) Internally generated plots using publicly available production data.

(2) Source: Peters & Co. Limited Sep'23 Overview table (see Appendix) with each of their coverage company's estimated 2024 corporate decline rates. Note integrated companies and Canadian large producers assume an oilsands production decline of 15%.

Marsden, Saskatchewan – Polymer Flood Pilot Project

- › Sizable oil pool where no secondary or tertiary enhanced recovery methods had been applied
- › If pilot validates large scale economic development, Hemisphere has amassed a meaningful land position (~13 Sections)
- › Built an oil battery with polymer injection skid
- › Commenced polymer injection in late Q3 2024 – no oil production response to date⁽¹⁾

Evaluating and testing new zones within existing landbase

- › Identify hydrocarbon bearing zones
- › Use modern seismic, drilling, and completion technology to test deliverability and economics

Aggressively pursuing acquisitions as well as exploration and development ideas

- › Evaluating and mapping opportunities that are complimentary to Hemisphere's current production base
- › Focused on oil-weighted growth assets where the Hemisphere team's experience can be leveraged to add value

⁽¹⁾ As disclosed in Hemisphere's news release dated November 25, 2025.

Returning to Hemisphere's Shareholders: Dividends and Share Buybacks

2026 Year-to-date

Total paid: \$1.0 million
shares: 0.5 million

Special Dividends

Additional returns when markets allow

Total paid: \$20.3 million
\$0.21/share

2026 YTD paid: \$5.7 million

April 28 \$0.03/share
May 28 \$0.03/share

2026 YTD Shareholder Returns

\$11.4 million^(2,3)

TOTAL Shareholder Returns

September 2019 – June 2026

\$83.1 million⁽³⁾

⁽¹⁾ Based on current market capitalization.

⁽²⁾ Includes \$4.7 million in quarterly base dividends, \$5.7 million in two special dividends, and \$1.0 million through the Company's Normal Course Issuer Bid.

⁽³⁾ Includes special dividend to shareholders of record on May 14, 2026 for payment on May 28, 2026 and upcoming quarterly base dividend to shareholders of record on June 12, 2026 for payment on June 26, 2026.

Why invest in Hemisphere? We're Built to Return Capital

High Free Cash Flow Yield

- › Low production decline rates
- › Low operating and capital costs
- › Long life, high netback returns

No Debt, Positive Cash Position, and Low Decommissioning Costs

- › More cash flow to return to shareholders
- › Capital available to grow the business

Actively Hunting for Acquisitions and Exploration/Development Ideas

- › Evaluating new opportunities for further growth with a balance sheet position to transact

Paying Dividends and Buying Back Shares

- › Returning to shareholders through quarterly base dividends and active share buybacks
- › Increased shareholder returns through special dividends during periods of higher commodity prices

Hemisphere

ENERGY

DISCIPLINED GROWTH

- › Geographically Focused
- › Enhanced Oil Recovery - Polymer Flood
- › Debt-free with undrawn Credit Facility

RELIABLE RETURNS

- › Free Cash Flow for our Shareholders
- › Continued Share Buybacks
- › Quarterly Base Dividends

Advisory Statements

Forward-Looking Information and Statements

This presentation contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "may", "will", "project", "should", "believe", "plans", "intends", "forecast", "potential" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this presentation contains forward-looking information and statements pertaining to the following: the Company's plans for dividends and share purchases, the Company's intention to provide shareholders with a low-risk opportunity that generates free cash flow to fund shareholder returns, plans for excess or remaining free funds flow and targets for the allocation of free funds flow, costs for future wells the Company's development plans for its assets and other business plans in 2026, including various enhanced oil recovery plans; the Company's business strategy and plans; the volumes and estimated value of the Company's oil and gas reserves; the volume and product mix of the Company's oil and gas production; production estimates and forecasts; future oil and natural gas prices and the Company's commodity risk management programs; future liquidity and financial capacity; future results from operations and operating metrics; future development, exploration, acquisition and development activities, infrastructure plans and related capital expenditures and the timing thereof; the total future capital associated with development of reserves and resources; and methods of funding our capital program. In addition, information and statements relating to reserves and are deemed to be forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, that the reserves described exist in quantities predicted or estimated, and that they can be profitably produced in the future.

Forward-looking statements or information are based on a number of material factors, expectations or assumptions of management which have been used to develop such statements and information but which may prove to be incorrect. Although management believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because management can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified herein, assumptions have been made regarding, among other things: the impact of increasing competition; the general stability of the economic and political environment in which management operates; the timely receipt of any required regulatory approvals; the ability of the Company to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling and EOR results; the ability of the Company to obtain financing on acceptable terms including the continued availability of its credit facilities; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development and exploration; risks associated with the degree of certainty in reserve assessments; the Company will realize the anticipated benefits of its enhanced oil recovery operations; the timing and cost of pipeline, storage and facility construction and expansion and the ability of the Company to secure adequate product transportation; future commodity prices; currency, exchange and interest rates; regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which the Company operates; inflationary pressure and related costs; supply chain availability and international trade; that the Company's dividend policy will remain the same and the Company will continue to be able to declare dividends; and the ability of the Company to successfully market its oil and natural gas products. There are a number of assumptions associated with the potential of resource in place volumes assigned to lands evaluated in the Company's area of operations, including the quality of the reservoir, future drilling programs and the funding thereof, continued performance from existing wells and performance of new wells, the growth of infrastructure, well density per section and recovery factors and discovery and development of the lands evaluated in such lands necessarily involves known and unknown risks and uncertainties, including those identified in this presentation.

The forward-looking information and statements included in this presentation are not guarantees of future performance and should not be unduly relied upon. Such information and statements, including the assumptions made in respect thereof, involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; the potential for variation in the quality of its assets; changes in the demand for or supply of the Company's products; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates, regulatory risks, including penalties or other remedial actions, the ability of the Company to maintain legal title to its properties, or other regulatory matters; changes in development plans of the Company, increased debt levels or debt service requirements; inaccurate estimation of the Company's oil and gas reserve volumes; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of inadequate insurance coverage; the impact of competitors, suspension of delays of operations, regulatory risks, including penalties or other remedial actions, the ability of the Company to maintain legal title to its properties, changes to budgets, activities by third party plant turnaround times; trade barriers; and continued ability to transport products, reserve volumes, business prospects and opportunities, the future trading price of the Company's shares, the availability and cost of financing, labor and services; the impact of increasing competition; ability to market oil and natural gas successfully and the Company's ability to access capital (including its credit facility); and the other risks described in the Company's Annual Information Form for the year ended December 31, 2025 available on www.sedarplus.ca.

The forward-looking information and statements contained in this presentation speak only as of the date of this presentation, and the Company does not assume any obligation to publicly update or revise any of the included forward-looking statements or information, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.

Financial Information

Except for guidance numbers and as otherwise noted, all financial information included in this presentation is per Hemisphere's audited consolidated financial statements for the year ended December 31, 2025 and unaudited condensed consolidated financial statements for the three months ended March 31, 2026. All amounts are expressed in Canadian dollars unless otherwise noted.

Forward Looking Financial Information

This presentation, including in respect of Company's guidance for 2026, may contain future oriented financial information ("FOFI") within the meaning of applicable securities laws. The FOFI has been prepared by management to provide an outlook of the Company's activities and results. The FOFI has been prepared based on a number of assumptions including the assumptions discussed and disclosed below under "2026 Corporate Guidance Assumptions" and "Forward Looking Statements" above and that the Company is cash taxable in 2026. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on FOFI. The Company's actual results, performance or achievement could differ materially from those expressed in, or implied by, these FOFI, or if any of them do so, what benefits the Company will derive therefrom. The Company has included the FOFI in order to provide readers with a more complete perspective on the Company's future operations and such information may not be appropriate for other purposes. The Company disclaims any intention or obligation to update or revise any FOFI statements, whether as a result of new information, future events or otherwise, except as required by law.

Advisory Statements

2026 Corporate Guidance Assumptions

Annual average production of 3,900 boe/d (99% heavy crude oil), with each of US\$60/bbl WTI, US\$80/bbl WTI, and US\$100/bbl WTI, paired with WCS Differential of US\$15.00/bbl and quality adjustment of \$4.00/bbl, and \$Cdn to \$US exchange rate of 0.73; operating and transportation costs of \$15.00/boe; net G&A costs of \$3.48/boe; Royalties on gross revenue of 16% at US\$60/bbl WTI, 20% at US\$80/bbl WTI and 22% at US\$100/bbl WTI; tax costs of \$5.54/boe at US\$60/bbl WTI, \$9.26/boe at US\$80/bbl WTI, and \$13.90/boe at US\$100/bbl WTI.

Non-IFRS and Other Financial Measures

Throughout this presentation and in other materials disclosed by the Company, Hemisphere employs certain measures to analyze financial performance, financial position, and cash flow. These non-IFRS and other financial measures do not have any standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other entities. The non-IFRS and other financial measures should not be considered to be more meaningful than IFRS measures which are determined in accordance with IFRS, such as net income (loss), cash flow from operating activities, and cash flow used in investing activities, as indicators of Hemisphere's performance.

Non-IFRS Measures

Adjusted funds flow, capital expenditures, free funds flow and working capital are each non-IFRS financial measures that are not standardized financial measures under International Financial Reporting Standards and may not be comparable to similar financial measures disclosed by other issuers. Please see "Non-IFRS and Other Financial Measures" in the Company's MD&A for the three months ended March 31, 2026 on SEDAR+ for: (i) an explanation of how such measures provide useful information and for what purposes management uses these measures; and (ii) a quantitative reconciliation of the non-IFRS financial measure to the most similar financial measure.

Forward Looking Non-IFRS Measures

Future estimates of adjusted funds flow (AFF), capital expenditures and free funds flow (FFF) are each forward looking non-IFRS financial measures that are not standardized financial measures under International Financial Reporting Standards and may not be comparable to similar financial measures disclosed by other issuers. Please see "Non-IFRS and Other Financial Measures" in the 2025 MD&A for: (i) an explanation of how such measures provide useful information and for what purposes management uses these measures; and (ii) a quantitative reconciliation of the historical non-IFRS financial measure to the most similar financial measure.

Non-IFRS Ratios

"Reserve life index" is calculated as total company interest reserves divided by annual production, for the year indicated.

"Adjusted funds flow" ("AFF") The Company considers AFF to be a key measure that indicates the Company's ability to generate the funds necessary to support future growth through capital investment and to repay any debt. AFF is a measure that represents cash flow generated by operating activities, before changes in non-cash working capital and adjusted for decommissioning expenditures, and may not be comparable to measures used by other companies. The most directly comparable IFRS measure for AFF is cash provided by operating activities.

"Working capital" is closely monitored by the Company to ensure that its capital structure is maintained by a strong balance sheet to fund the future growth of the Company. Working capital is used in this document in the context of liquidity and is calculated as the total of the Company's current assets, less current liabilities, excluding derivative financial instruments, decommissioning obligations, lease liabilities, and tax provisions, and including any bank debt. There is no IFRS measure that is reasonably comparable to working capital.

"AFF per boe" and "AFF per basic share" Hemisphere calculates AFF per boe as AFF divided by average daily production (presented in boe). Hemisphere calculates AFF per share as AFF divided by the number of shares indicated. AFF is a non-IFRS financial measure component of the AFF per boe and AFF per share ratios. Management believes that AFF per boe is a key industry performance measure of operational efficiency and one that provides investors with information that is also commonly presented by other crude oil and natural gas producers and the measurement on a Boe basis assists management and investors with evaluating Hemisphere's operating performance on a comparable basis. Management believes that AFF per share is a key industry performance measure of financial efficiency on equity capital, and one that provides investors with information that is also commonly presented by other crude oil and natural gas producers and the measurement on per share basis assists management and investors with evaluating Hemisphere's financial performance on a comparable basis.

"Free funds flow" ("FFF") is calculated by taking AFF and subtracting capital expenditures, excluding acquisitions and dispositions. Management believes that free funds flow provides a useful measure to determine Hemisphere's ability to improve returns and to manage the long-term value of the business.

"FFF per basic share" Hemisphere calculates FFF per share as FFF divided by the number of shares indicated. FFF is a non-IFRS financial measure component of the FFF per share ratio. Management believes that FFF per share is a key industry performance measure of financial efficiency on equity capital, and one that provides investors with information that is also commonly presented by other crude oil and natural gas producers and the measurement on per share basis assists management and investors with evaluating Hemisphere's financial performance on a comparable basis.

"Capital expenditures" is a term used by management as a measure of capital investment in exploration and production assets, and such spending is compared to the Company's annual budgeted capital expenditures. The most directly comparable IFRS measure for capital expenditures is cash flow used in investing activities.

"EBITDAX" (Earnings Before Interest, Taxes, Depreciation, Amortization and Exploration Expense) is a non-IFRS financial measure and does not have a standardized meaning under IFRS. This measure is used by management to evaluate operating performance, excluding the impact of interest, taxes, depreciation and amortization expenses, which can vary significantly among companies.

Advisory Statements

Supplementary financial measures

This corporate presentation may contain certain supplementary financial measures. NI 52-112 defines a supplementary financial measure as a financial measure that: (i) is intended to be disclosed on a periodic basis to depict the historical or expected future financial performance, financial position or cash flow of an entity; (ii) is not disclosed in the financial statements of the entity; (iii) is not a non-IFRS financial measure; and (iv) is not a non-IFRS ratio.

Management believes EBITDAX provides useful supplemental information to investors about the Company's operating performance and financial condition. A reconciliation of EBITDAX to the most directly comparable IFRS measure is provided:

(\$000s, except \$ per boe)	Three Months Ended March 31, 2026
Net income	7,867
Addback	
▪ Income tax expense	2,516
▪ Finance expenses	147
▪ Non-cash items	
○ Deferred tax expense	426
○ Depletion & depreciation	3,216
○ Exploration & evaluation expense	47
○ Share-based payments	1,078
○ Unrealized loss on financial instruments	(3)
○ Unrealized gain on foreign exchange	4
EBITDAX for the period	15,296
EBITDAX for the period (\$/boe)	\$44.60

Information Regarding Disclosure on Oil and Gas Reserves, Resources and Metrics

Unless otherwise specified, all reserve and resource estimates disclosed in this presentation are derived from the Company's independent reserve evaluations (the "Reserve Evaluation"). The reserve and resource estimates contained herein are estimates only and there is no guarantee that the estimated reserves or resources will be recovered. Actual oil, gas, and natural gas liquids reserves may be greater

than or less than the estimates that are provided herein. In relation to the disclosure of estimates for individual properties, such estimates may not reflect the same confidence level as estimates of reserves and future net revenue for all properties, due to the effects of aggregation. The Company's belief that it will establish additional reserves over time with conversion of resources into reserves and probable undeveloped reserves into proved reserves are forward-looking statements and are based on certain assumptions and is subject to certain risks, as discussed under the heading "Forward-Looking Information and Statements".

Net Present Values

It should not be assumed that the estimates of the future net revenues presented in this presentation represent the fair market value of the reserves. There is no assurance that the forecast prices and costs assumptions herein will be attained and variances could be material.

Oil and Gas Metrics

This presentation contains metrics commonly used in the oil and natural gas industry, such as "reserve life index" ("RLI"). RLI is calculated as total company interest reserves divided by annual production, for the year indicated.

This term does not have a standardized meaning and the Company's calculation of such metrics may not be comparable to the calculation method used or presented by other companies for the same or similar metrics, and therefore should not be used to make such comparisons. Management uses these oil and gas metrics for its own performance measurements and to provide shareholders with measures to compare the Company's operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented in this presentation, should not be relied upon for investment or other purposes.

BOE Equivalent

Natural gas and liquids reserves and volumes are converted to a common unit of measure on a basis of six Mcf of gas to one bbl of oil. Disclosure provided herein in respect of BOE may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 Mcf: 1bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the well head. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different than the energy equivalency of 6:1, utilizing a 6:1 conversion basis may be misleading as an indication of value.

Third Party Information

Certain market, third party and industry data contained in this presentation is based upon information from government or other industry publications and reports or based on estimates derived from such publications and reports. Government and industry publications and reports generally indicate that they have obtained their information from sources believed to be reliable, but Hemisphere has not conducted its own independent verification of such information. No representation or warranty of any kind, express or implied, is made by Hemisphere as to the accuracy or completeness of the information contained in this document, and nothing contained in this presentation is, or shall be relied upon as, a promise or report by Hemisphere.
